

Measurement-Device-Independent Quantum Key Distribution over Untrustful Metropolitan Network

Academic Interview

1. In your view what are the main advantages of Measurement Device Independent Quantum Key Distribution (MDIQKD) over Prepare and Measure Quantum Key Distribution (PMQKD)?

2. What issues arise when you scale up a MDIQKD network to a city sized population?

3. What do you think the next steps are to achieving an information-theoretically secure global network through quantum communication?

4. ...
